

## Rev. Paul Gonyea's Religious Science 4 part basic series but with a twist

Sunday, January 7, 2007 at Religious Science's Celebration of Life was an energetic time for everyone who attended. After identifying our learning styles, (audio, visual or kinetic) everyone gathered at a table designated for their learning style table.

Supportive materials were provided to support each learning style as we listened to the lecture. Wonderful movement and color accentuated the clear message that Rev. Gonyea's lectures bring.

After the lecture responding to the question was asked; how would you describe God to someone who asked what Religious Science believes about God each group held a brief discussion to their learning with the larger group. Here are some of the results from these group discussions. This list is a wonderful resource in case you ever need a quick reminder or a different perspective.

### GOD IS

Audio	Kinetic	Visual
God supports us being healthy	We shape our lives based on the type of God we believe in;	The Thing itself.
One Mind	We worship God as we understand It.	God is Perfect and we are too.
God IS IN	No Limitations- Receive	God is Love.
God is ultimate good, unbiased, wants best for us, Loving, peaceful,	Our concept of God defines the boundaries of what we are able to create and receive.	God is a personal God right where you are. Loving you unconditionally
Our consciousness is shared with God	We are not out thoughts. Life is the tail of a peacock.	God works with you as we co-create.
Simple Teaching; thinking, feeling, being	Ask not and you shall not receive. God is a Word and the Word is YES.	God Is all there is. Unlimited source available to all at any time
Uncomplicated belief. Persons are the "divine fire"	We are the embodiment of our thoughts and become a living embodiment of God.	Understanding of what God is based on your human understanding.
God is the ONLY Power. We are (God is) limitless and powerful	God wants the best for us. God has given Itself to us to receive It.	Any Power can be used for good or bad.
God wants nothing. IT is non-judgmental	When we stop learning, growing and expanding, we begin to die.	What kind of God I believe in.
We are NOT separate from God.	Every natural and man-made disaster is an opportunity to create a new and different lift. Look for the gift.	No Limitation, Simple

Change my mind and keep it changed	God has no religion. Religions are human inventions	
Potential to create a world greater than the one before.		
God supports us being healthy.
