

## Rev. Paul Gonyea's Religious Science 4 part basic series but with a twist

Sunday, January 14, 2007 at Religious Science's Celebration of Life was again an energetic place to be as we listened and discussed The Way It Works. Choice, that wonderful option we all express everyday in our life was added to the options of working with friends with like learning styles, (audio, visual or kinetic). I, Gloria Nelson, chose to listen with the kinetic group and was amazed at how wonderful it was to shape a piece of clay while listening. It reminded me of the meditative movement that comes with doing some form of needlework while listening.

After the lecture, responding to the question; remembering what we believe about The Thing Itself, how would you describe The Way IT Works, to someone who asked you questions about what Religious Science believes?

Each group held a brief discussion and a group designated spokesperson shared their learning with the larger group. Here are some of the results from these group discussions. This list is a wonderful resource in case you ever need a quick reminder or a different perspective.
